TRAN VAN LAP

Middle – Senior Frontend Developer

Ho Chi Minh City | 0375411324 | tranvanlap2069@gmail.com | https://tranvanlap.vercel.app
https://www.linkedin.com/in/tranvanlap

SUMMARY

Frontend Developer with 5+ years of experience building scalable web applications, enterprise management systems, and Web3 platforms using React.js, Next.js, Vue.js, and TypeScript. Experienced in designing reusable component architectures, implementing complex business workflows, integrating RESTful APIs and blockchain services, and optimizing frontend performance. Capable of owning frontend delivery from requirement analysis to deployment support, with hands-on experience in code reviews, technical guidance, and mentoring junior developers.

WORK EXPERIENCE

Frontend Developer - Pione Group **Jul, 2023 – Sep, 2026**

- Developed and maintained 20+ web projects across Web3/Blockchain, E-commerce, Admin/Back-office, Real Estate, Agriculture, and Data Management using React.js, Next.js, Vue.js, and TypeScript.
- Designed scalable frontend architecture, reusable UI components, and shared patterns to improve code quality and maintainability.
- Built complex business workflows, including CRUD operations, dynamic forms, dashboards, advanced data tables, search/filtering, pagination, and data visualization.
- Integrated RESTful APIs, third-party services, WebSockets, and blockchain interactions using Web3.js and Ethers.js in collaboration with Backend teams.
- Owned frontend development from requirement analysis and technical design to implementation, debugging, performance optimization, and maintenance.
- Optimized frontend performance using Lighthouse, React Profiler, and Chrome DevTools to identify loading bottlenecks and unnecessary re-renders.
- Conducted code reviews, coordinated frontend tasks, and mentored 3–5 junior developers and interns.
- Contributed to frontend technical decisions and cross-functional collaboration to deliver maintainable solutions aligned with business requirements.

Frontend Developer (Onsite) - Salto Vietnam **Jan 2023 – Jun 2023**

- Developed an internal Recruitment Management System, supporting job postings, candidate management and recruitment workflows.
- Built complex forms, dynamic fields, validation rules, data tables, search/filter and pagination using React.js and TypeScript.
- ·Integrated REST APIs with Axios and TanStack Query to support data fetching, caching and synchronization.
- Developed reusable components using Ant Design and Material UI, improving interface consistency and maintainability.

Frontend Developer (Onsite) - EG Group **Jun, 2021 – Dec 2022**

- Developed and maintained responsive web applications using React.js, Vue.js and JavaScript.
- Built reusable frontend components and integrated RESTful APIs for business applications.
- Collaborated with Backend developers to implement new features, troubleshoot issues and improve system performance.

PROJECTS & QUALIFICATIONS

PIONE CHAIN & NFT

Web3 / Blockchain Platform · pionechain.com

- Developed blockchain dashboards and NFT-related interfaces, supporting asset management and transaction visibility.
- Integrated blockchain data and smart contract interactions using Web3.js and Ethers.js.
- Built reusable UI components and managed application state with Redux Toolkit and TanStack Query.

Tech Stack: React.js, Next.js, TypeScript, Redux Toolkit, TanStack Query, Web3.js, Ethers.js, GSAP, TailwindCSS, SCSS.

PIONE LINEAGE

Genealogy & Data Management Platform · genealogy-management-system.vercel.app

- Developed complex genealogy management interfaces for visualizing family relationships and member information.
- Implemented dynamic forms, data tables, advanced filtering, pagination and relationship diagrams.
- Integrated REST APIs and optimized server-state management using TanStack Query.

Tech Stack: React.js, Next.js, TypeScript, Redux, TanStack Query, Ant Design.

RECRUITMENT MANAGEMENT PLATFORM

Enterprise HR Management System

- Developed frontend features supporting job postings, candidate management and recruitment workflows.
- Built complex business forms with validation, dynamic fields and reusable UI components.
- Integrated REST APIs and implemented data synchronization using Axios and TanStack Query.

Tech Stack: React.js, TypeScript, Ant Design, Material UI, React Hook Form, Formik, Yup.

EDUCATION

- University of Information Technology (UIT) Bachelor of Information Technology | 2026
- Thu Duc College of Technology (TDC) Associate Degree in Information Technology | 2022

SKILLS

- Core Frontend: React.js, Next.js, Vue.js, TypeScript, JavaScript.
- UI Development: HTML5, CSS3, TailwindCSS, SCSS, Ant Design, MUI.
- API Integration: REST APIs, Axios, API Integration, Authentication & Authorization.
- State Management: Redux, Redux Toolkit, Zustand, TanStack Query, Context API.
- Web3: Web3.js, Ethers.js, Wallet & Smart Contract Integration.
- Engineering: Component Architecture, Performance Optimization, Code Review, Git.
- AI & Development Tools: ChatGPT, Claude, Cursor, Antigravity, AI-assisted Development.
- Collaboration: Requirement Analysis, Agile/Scrum, Technical Mentoring

PROFESSIONAL ACTIVITIES

- Technical Judge – AI Hackathon Pione Dream 2025: Evaluated projects in AI, Blockchain, and Web3.
- Semifinalist – VietChain Talents: Reached the semifinals of a Blockchain competition.
